Precipitation probability					
20%	30%	40%	40%	20%	20%

Forecast for Saturday 14 Aug 2021

Weather: Clear spells during the early hours should give way to increasing cloud from the southwest towards dawn, with a little rain possible for a time. Brightest but rather cloudy during the morning, with this lifting and breaking beneath higher cloud. This trend should reverse during the afternoon, with cloud thickening and lowering once again, culminating in spells of rain into the evening. Windy throughout in exposure.

Chance of cloud free mountain/hill tops above 600m: 30% at first, improving 80% for a time as this lifts and breaks, but falling back by evening to around 500 metres.

Visibility: Perhaps moderate early and late, with an intervening period of better conditions, although moist air and rather a lot of cloud around will impair viewing distances.

02:00 on Sat 14 Aug 2021	0mm	0mm	2.2mm

Forecast for Sunday 15 Aug 2021

Weather: Rather damp and cloudy at first, probably giving way to a heavier spell of rain before perhaps clearing southeastwards late in the day, although there is low confidence in the precise timings. Poor visibility in light winds expected early on, improving later.

Maximum wind: Strengthening northwesterly 35mph.

Chance of cloud free mountain/hill tops above 600m: Nil improving 80% as cloud down to 300 metres lifts clear of peaks during the morning.

Visibility: Poor improving very good late on.

Temperature: **Valleys:** Plus 12 becoming plus 18 Celsius.
At 600m: Plus 13 Celsius.
Freezing level: Well above the peaks.
